Behavioral Insights in Practice: Lessons for the Financial Sector

On September 28th, IPA's Financial Inclusion Program, together with JPMorgan Chase & Co., co-hosted a workshop on using behavioral insights in the financial sector. The event brought together top behavioral scientists from both academia and industry to present recent research on financial products and services, and how participants can integrate these lessons into their own work. The event also explored how rapid-fire testing can be used by both financial institutions and nonprofit service providers to improve the design and delivery of products and services. Speakers included experts from Dartmouth College, University of Chicago Booth School of Business, University of Chicago Harris School of Public Policy, Intuit, Morningstar, JPMorgan Chase & Co., and Innovations for Poverty Action. It was attended by about 40 participants from the private, nonprofit, and government sectors.
