SME Initiative 2013 Working Group

SME Initiative hosted its third Working Group Meeting on May 11, 2013 at Columbia University in New York, NY. The intent of the meeting was to bring together our affiliate network of researchers and practitioners to discuss and provide feedback on new and upcoming research on SME growth and entrepreneurship. The Working Group provided an opportunity for affiliates of the SME Initiative to share their work, discuss potential areas for collaboration, and network with others active in the SME space.

A diverse array of presentations covered topics including, among others, the impact of credit scoring for SMEs, role of buyer and supplier data in access to finance in Peru, input complementarities among soccer ball producers in Pakistan, agent intermediated lending, impact of partial credit guarantee in Indonesia, and secured transactions reform in Colombia. The Meeting also included a presentation about a new research opportunity on high growth entrepreneurship supported by IADB. Two winners of the G20 SME Finance Challenge, BiD Network and Medical Credit Fund, described their work and potential areas for collaboration with researchers.

Presenters included:

Welcome and Overview
