Evidence Showcase: Using Digital Products to Overcome Behavioral Barriers

On Friday, October 21st, the Financial Inclusion Program hosted a public webinar as part of [Financial Inclusion 2020 Week](#). The webinar showcased the latest rigorous evidence on how digital products can help consumers overcome behavioral barriers and featured presentations by two of FIP's researchers, William Jack (Georgetown University) and Aaron Dibner-Dunlap (IPA). Their presentations are available below. You can also watch the webinar recording [here](#).
