Supporting Adolescent Girls in the Time of COVID-19: Evidence and Policy for Bangladesh

Thursday, April 8, 2021
8:00 - 9:30AM EDT / 6:00 - 7:30 PM BST

The COVID-19 pandemic has had a disproportionate impact on women and girls globally, widening existing inequalities in livelihoods, burden of care, schooling, and violence. Designing social policies to mitigate these impacts and support educational opportunities for girls—including to help them return to school and strengthen the skills they need to succeed in the workforce—is critical to post-pandemic economic recovery and gender equality.

To understand the extent of these issues, and to shed light on the pandemic's particularly hidden impacts on vulnerable girls, policymakers have needed data and evidence. Recent research conducted during and before the pandemic can help the policy and practitioner communities in Bangladesh better understand how adolescent girls have been impacted by the public health crisis and by the measures put in place to contain the virus, helping to shape responses.

This event will convene researchers, policymakers, and practitioners to share research findings and discuss policy solutions to explore the following questions: How have girls' education and livelihoods been impacted? Is early marriage increasing? How can data and evidence be used to support policies that help adolescent girls? A facilitated Q&A session among invited speakers from government, international and local organizations, and academia will follow the presentations.

This private event is part of IPAs **RECOVER Roundtable Series: Bringing Evidence to COVID-19 Policy Responses in the Global South** and the **Women's Work, Entrepreneurship, and Skill (WWEES) Initiative**. Together with our partners, we are using this series to exchange learnings between the policy, practice, and research communities to support evidence-informed response efforts. More information about RECOVER is available [here](#) and WWEES [here](#).

Presenters (in alphabetical order)

- Sarah B. Ains, Associate Professor of Global Health and Economics, George Washington University
- Monira Masrura, Research Fellow, Institute of Developing Economics, and Visiting Research Fellow, GRI Center, Population Council
- Shahana Nazneen, Qualitative Researcher, Girl Empowerment Project, Southern Bangladesh, Innovations for Poverty Action
- Kuan Yifeng, Research Associate, Duke University
- Zaki Wahid, Reader in Economics, University of Kent

Host

- Mohammad Ashraf Waqar, Country Director, Innovations for Poverty Action in Bangladesh

Moderator

- Marwan Sultan, GAGE Bangladesh Qualitative Research Co-lead at BRAC University

Policy Stakeholders

- Tahmina Ahmed, Executive Director, Underprivileged Children's Educational Programmes (UCEP) Bangladesh
- Sandra Amin, Senior Associate, Population Council

Policy Reflections

- MD Afaq Hussain Samad, Policy Specialist (Educational Innovations), Agre to Innovate (A2I) Program, ICT Division, Ministry of Health, Telecommunications and Information Technology
- Rayhana Tashin, Project Director, 8 Government Secondary Schools Project, Directorate of Secondary and Higher Education, Ministry of Education

Roundtable | Supporting Adolescent Girls in the Time of COVID-19: Evidence and Policy for Bangladesh

The COVID-19 pandemic has had a disproportionate impact on women and girls globally, widening existing inequalities in livelihoods, burden of care, schooling, and violence. Designing social policies to mitigate these impacts and support educational opportunities for girls—including to help them return to school and strengthen the skills they need to succeed in the workforce—is critical to post-pandemic economic recovery and gender equality.

To understand the extent of these issues, and to shed light on the pandemic's particularly hidden impacts on vulnerable girls, policymakers have needed data and evidence. Recent research conducted during and before the pandemic can help the policy and practitioner communities in Bangladesh better understand how adolescent girls have been impacted by the public health crisis and by the measures put in place to contain the virus, helping to shape responses.

On April 8, 2021, this roundtable event convened researchers, policymakers, and practitioners to share research findings and discuss policy solutions to explore the following questions: How have girls' education and livelihoods been impacted? Is early marriage increasing? How can data and evidence be used to support policies that help adolescent girls? A facilitated Q&A session among invitees from government, international and local organizations, and academia followed the presentations.

This event was part of **IPA's RECOVR Roundtable Series: Bringing Evidence to COVID-19 Policy Responses in the Global South** and the **Women's Work, Entrepreneurship, and Skilling (WWES) Initiative**. Together with our partners, we are using this series to exchange learnings between the policy, practice, and research communities to support evidence-informed response efforts. More information about RECOVR is available [here](#) and WWES [here](#).
