Findex Results: The Resilience Question

Elisabeth Rhyne, Center for Financial Inclusion
May 30, 2018
In most regions, respondents signaled lower resilience in 2017 than in 2014.

The “resilience question” queries ability to come up with funds quickly to meet an emergency.

In some regions, differences are within the margin of error of the survey.
Resilience is worse for disadvantaged groups.
Perceived Financial Control Has No Clear Relationship With Account Ownership

- Financial Control
- Account Ownership (% Age 15+)

- Kenya: 14%
